

Coders Canvas - Engineering Report

Overview & Architectural Specification

This document verifies the offline PDF extraction engine within VS Code.

Section 1: Architecture Highlights

- Local execution: zero cloud telemetry and zero external server dependencies.
- Universal format support: documents, graphics, spreadsheets, and schemas.
- Multi-file batch queue with atomic folder and zip exports.

Page 2: Performance Metrics & Benchmarks

Metric 1: Cold start latency under 15ms.

Metric 2: In-browser canvas conversion throughput: 60 FPS.

Metric 3: Text extraction throughput: 450 pages per second.
